

# GALENA

American

**Origin:** USA. Galena was bred in 1968 from an open pollination of an unknown male with Brewers Gold. Released in 1978, it continues to enjoy success as a multipurpose high-alpha variety.

**Usage:** Given its high alpha and crop yield, Galena is most often found as a classic bittering hop, in much the same vein as Nugget and its descendants. As a finishing hop, it is sought after for its clean, citrus character.

**Aroma & Flavor Characteristics:** Mild to moderate, with a surprisingly pleasant tropical citrus quality. Later additions may add black currant notes. It can have a slightly “rustic” edge which belies its Brewers Gold ancestry.

  
**SENSORY HIGHLIGHTS**  
Citrus  
Black Currant  
Earthy

  
**BREWING VALUES**  
Alpha Acid Range: 11.5 - 13.5%  
Beta Acid Range: 7.2 - 8.7%
