KEEP FILLING, LOOKING AT HARVEST DATES IN AUGUST.

USA, QUALITY IS THERE. YIELD ESTIMATES ARE AN AVERGE CROP. COUPLE OF GROWERS ARE TALKING ABOUT HARVEST. LET'S HOPE THE RAINS HOLD OFF SO THAT WAY GROWERS CAN GET THE BARLEY OFF IN GOOD CONDITION. (FINGERS CROSSED)

CANADA, COOL AND WET, TOO WET IN SPOTS, STRONG BARLEY CROP OVERALL, HEADS ARE FILLING.

**Explorer, West Central North Dakota, Unreal!** 

Synergy, North Central North Dakota, Nice!

New variety called Copper. Champion, AB This grower's field is almost shoulder high. Wow!

Wild Oats and Green Foxtail show up every year. They love to steal nutrients from the barley. Causing barley in these spots to be lower quality and low yielding.
