

HS Grove™

Breeding/Development: Added to the Hop Solutions line in 2023, HS Grove™ was developed for hop-forward beer styles and is available exclusively from BSG.

Brewing Application: Primarily designed for late kettle, whirlpool, and dry hopping applications. HS Gove™ has shown excellent biotransformation qualities – additions made during fermentation will amplify its stone fruit character even more. Choose HS Grove™ for West Coast IPA, New England IPA, Double IPA, American pale ale, or any other style where fresh stone fruit aromatics are desired.

Sensory: Stone fruit aroma up front gives way to pleasant notes of orange, papaya, and pine resin.

SENSORY HIGHLIGHTS

**Stone fruit
Citrus
Pine**

BREWING VALUES
